Plates & Glasses	Kegs & Keg Coolers	Ceiling Fabric & White X-Mas Lights

Pickering Barn Audio Sound System Details   Rental Fee: $200

It's a <u>portable unit </u>– which means it can be used in either room (Hay or Dairy) as well as outside in the Courtyard. It is not an in-house system with sound piped throughout the building.

System Use
The system was purchased to provide events the ability to play background music during their events and have microphones to make announcements with. The unit was not purchased to handle multiple instrument plug-ins, adapt to outside systems or speak over a noisy & over-excited crowd. For events that expect a higher caliber sound performance (especially auctions), it is recommended that you hire a professional DJ with a professional system of his/her own to manage the audio for your event.

System Set-Up
When our system is rented, the Barn staff will set the unit up in the requested location and test that it is up & running properly. We do not however provide sound technicians to trouble-shoot technical
audio issues, coordinate the compatibility of our system with outside equipment or run the system for your event.

Outdoor Use of System
Should you wish to use our system outdoors we will set the system up on the cobblestone courtyard. The mixer board will be set-up East of the Creamery where it is protected from weather, convenient to move indoors and has nearby electrical. The speakers will be spaced out on in the courtyard to provide audio balance.
If you want to use the system outdoors for a wedding ceremony, the system will be set-up behind your guests; East of the Creamery. We do not set-up the system near the gazebo or in the grass because it is visually unappealing for your photos, less acoustically pleasing, damages the landscaping and is too far to move indoors quickly should the weather turn.

The system includes the following components:

Mixer Board	2 Wireless Microphones	2 50' Cables
CD / Tape Player	1 Wireless Lapel Microphone	5 25' Cable
2 Portable Speakers on Stands	2 Corded Microphones	1 30' Cable
	2 Microphone Stands	

PEAVEY – PV 10 Compact Mixer:
- 6 microphone or instrument compatibility
- i pod & laptop hook-up
  *connection cords need to be provided by ipod or laptop owner
